Building Envelope Quality Assurance is a one-day course for professionals interested in field inspections and quality of applications, including material manufacturers, general contractors, quality assurance observers, and field inspectors. This course covers the diverse and challenging aspects of roofing, waterproofing, and exterior walls encountered in the field. Highlights of the program include the role and responsibilities of the quality observer associated with roofing, waterproofing, and exterior wall projects; contract administration; construction contract documents; ethics; and job site safety.

Educational Credits

- 8 Continuing Educational Hours (CEHs) from RCI.
 - 8 Learning Units (LUs) from the American Institute of Architects.
- Approved for Health Safety and Welfare credit

<i>Presenters</i>		
	<p>Ray Wetherholt, FRCI, RBEC, PE has expertise in roofing, waterproofing, and building envelope consulting. He started Wetherholt and Associates in 1984 to assist owners, architects, contractors, and occasionally attorneys in resolving water intrusion related issues.</p> <p>Prior to starting Wetherholt and Associates he worked for a commercial construction inspection and testing company as their inspection supervisor and special projects troubleshooter, resolving concrete, steel, and masonry issues, along with developing the roofing and waterproofing inspection team.</p>	
		<p>Andre Coppin, RRO, RRC is the Building Envelope Project Manager at Cornerstone Architectural Group. Andre began his career in construction working as a carpenter's helper and concrete laborer. After graduating from Western Washington University in 1999, Andre taught computer aided drafting and design, physics and math at a polytechnic for 5 years.</p> <p>Currently, Andre is responsible for building envelope strategies for new construction, historic building renovations and a wide range of reroofing, waterproofing and envelope projects. In addition to his duties, Andre is the lead designer for building envelope projects.</p>
	<p>Aaron Nelson, RRO, RRC, RWC is the President of Roofing Technical Services located in Stanwood, WA. Aaron started in the roofing industry just after graduating from high school by working as a sheet metal fabricator/installer for a commercial contractor in Seattle, WA.</p> <p>Aaron worked his way into the office of that roofing contractor in Seattle, and worked as an estimator/project manager for 10-years. In 2004 Aaron joined the consulting side of roofing and started on working on projects across the nation. Aaron and the team at RTS provide consulting and quality-assurance observations for our clients on projects large and small.</p>	
		<p>Michael S. Caniglia, RRO, RBEC brings sixteen years of experience in the roofing, waterproofing, and building envelope industry. All sixteen years have been spent with Wetherholt and Associates, Inc., where he is currently a Senior Field Engineer and Principal. Mike received his BA in Architectural Studies from the University of Washington in 1993.</p> <p>Over the years, he has consulted on commercial and institutional buildings, mostly in the Pacific Northwest. Projects have ranged from large office complexes to public schools and colleges/universities to government facilities, including public utility districts, public transit, and county courthouses.</p>

*All additional fees, such as hotel and travel arrangements, are the responsibility of the registrant. Cancellations received 7 calendar days prior to the event will be granted a 50% refund. No refund or credit will be granted for requests received less than 7 calendar days prior to the event.
